

DEMPSEY'S SERVICE CENTER

Owner/User:
Dempsey's Service Center

Project Location:
Newark, Delaware

Size:
6,500 SF Facility

Building Use:
Automobile Service Center

Delivery System:
Design/Build

Project Completion:
2002

Description:
The new service center for the Dempsey's replaced an older dilapidated facility that had stood on this site for decades.

One of the major challenges with this new facility was to create a contextual building in a predominately residential area.

The new service center provides a state of the art automobile service floor and much needed modern reception area, offices, and bathroom facilities.
