

RAIL TRANSFER STATION

Owner/User:
Cargill, Incorporated

Project Location:
Elkton, Maryland

Contract Value:
\$1,000,000.00

Building Use:
Agricultural Rail & Truck Transfer Terminal

Delivery System:
Negotiated/Design/Build

Project Completion:
2003

Description:
Our second major project for Cargill, this rail to truck transfer terminal was one of great complexity.

This terminal involved designing a retaining wall massive enough to support a full rail car while acting as a bridge to distribute its cargo from beneath.

The lower level is designed to accommodate a cargo truck to transfer goods from the rail car.
