SOLID WASTE OPERATIONS FACILITY

Owner:
Cecil County Government

Project Location:
North East, Maryland

Size:
10,335 SF

Cost:
$4.37M

Building Use:
Industrial | Warehouse

Delivery System:
Design | Build

Project Completion:
2026

Architect:
Nowland Associates, Inc.

Description:
Nowland Associates provided comprehensive design-build services for the Cecil County Government Solid Waste Operations Facility, delivering a modern and efficient solution tailored to the County's operational needs. The project consisted of the design and construction of a new pre-engineered steel building that consolidated critical functions into a single, well-organized facility.

The new building was designed to accommodate all administrative offices alongside a fully equipped vehicular maintenance and repair garage.

The completed facility delivers a functional, durable, and efficient operations hub for Cecil County's solid waste department, supporting day-to-day administrative functions while providing a safe and practical environment for vehicle servicing and repairs.
