Size:

4,600 SF

Project Cost:

\$436K

Building Use:

Agricultural Storage

Delivery System:

Design / Build

Project Completion:

2018

Architect:

Nowland Associates, Inc.

Description:

Chateau Bu-De Winery is a state of the art wine making facility overlooking the banks of the Bohemia River, located on the historic Bohemia Manor Farm.

The building was designed and constructed to house all of the equipment and storage needs of the entire facility.

This facility is a pre-engineered steel building structure clad with cedar siding. Custom wood sliding doors were also used to tie into the rest of the adjacent winery facility buildings.
