Chesapeake City, MD

**Size:**

11,200 SF

**Project Cost:**

\$2.8M

**Building Use:**

Agriculture / Wine Production

**Delivery System:**

Design / Build

**Project Completion:**

2015

**Architect:**

Nowland Associates, Inc.

**Description:**

Chateau Bu-De Winery is a state of the art wine making facility overlooking the banks of the Bohemia River, located on the historic Bohemia Manor Farm.

The building was designed within the context of the historic farm property while looking to it's history for inspiration. While the building appears agricultural in nature, the inside is nothing short of high tech.

This specialized, climate controlled facility is home to 19 custom fermentation tanks designed and manufactured in South Africa. Also part of the building's program are barrel room for aging the wine, finished goods storage, a grand foyer for hospitality, an exterior crush pad, laboratory and offices.

It was necessary that the project be completed on a fast-track schedule of six months, to be open in time for the fall harvest .
