

FACILITY MAINTENANCE BUILDING

Owner:

St. Andrew's School

Project Location:

Middletown, Delaware

Size:

19,500 SF

Building Use:

Maintenance

Delivery System:

Design/Build

Project Completion:

2002

Architect:

Richard C. Meyer,
Architect

Description:

The structure of this building is a pre-engineered metal building system with three specialty light wells protruding out of the roof.

The skin of the building is an atypical horizontal siding with aluminum windows.

The interior of the building is comprised of offices, conference room, wood shop, drafting room, car wash bay, campus storage, break room, and a five bay garage.
