

DUMPSTER ENCLOSURE

Owner:
Agilent Technologies, Inc.

Project Location:
Wilmington, DE

Size:
1,030 SF

Cost:
\$99,400—Project

Building Use:
Industrial / Small Projects

Delivery System:
General Contractor

Project Completion:
2018

Architect:
Chicago Design Network

Description:
Added a structural steel dumpster enclosure to existing storage building. Structure was designed and built to tie-in to the existing steel and roof elevations. EPDM roof, metal siding & perimeter copings are used to keep the space weather tight. Fire suppression system and lighting were extended to accommodate the area under the structure.
